GitHub: https://github.com/shivangchoubey/ Mobile: +91-8319514903

SKILLS

- **Languages:** JavaScript, Java, Python,C++
- **Frontend:** HTML and CSS, Tailwind, React
- **Databases & ORMs:** MySQL, MongoDB ,PostgreSQL, Mongoose, Prisma
- **Backend:** Node.js, Express.js, JWT, Zod, RESTful APIs
- **Tools:** Git ,GitHub, Postman, Docker, GitHub Actions, VS Code
- **Soft Skills:** Problem-Solving, Leadership, Emotional Intelligence, Adaptability, Collaboration & Communication

PROJECTS

Praesto – Self-Hosted Application Deployment Platform | GitHub — Jul 26 – Present

- This is a self-hosted platform that lets you deploy GitHub repositories and gives you public URLs without paying for cloud servers, using OpenZiti (Zrok) for secure tunneling.
- Developing a React dashboard with a Node.js/Express backend, implemented 20 REST APIs across 5 resource domains to manage projects, agents, deployments, and system logs.
- Designed and implemented a PostgreSQL data layer using Prisma ORM featuring 7 core models. Developed a 5-stage state-driven deployment lifecycle (PENDING → BUILDING → RUNNING → FAILED → OFFLINE) .
- Implemented a local Node.js agent daemon for Docker-based builds with dynamic port allocation, 5s deployment polling, 30s heartbeats, and container health checks with a 90s readiness deadline.

Tech: React, Node.js, Express.js, PostgreSQL, Prisma, Docker, GitHub, Git, Cloud Tunneling (Zrok)

Dhanex – A Fundraising Platform | GitHub | LIVE — May' 26

- Implemented JWT-based authentication and role-based authorization for 2 user types (Founder & Investor).
- Engineered investment validation logic preventing over-funding and enforcing funding limits (100% cap control).
- Designed and developed 10+ RESTful APIs for campaign creation, investment handling, fund tracking, and validation, and integrated real-time funding progress tracking with dynamic percentage updates.

Tech: MongoDB Atlas, Mongoose, React, Tailwind, Node.js, Express.js, Zod, JWT, Docker, GitHub Actions

Velo-Rapido – Bike Rental Website | GitHub — Apr' 25

- Built secure user authentication and registration functionality to manage customer and admin sessions effectively.
- Implemented online reservation and booking system with date/time selection and reservation tracking.
- Enabled damage reporting allowing customers to report issues post-rental, and admins to monitor maintenance.

Tech: HTML, CSS, Tailwind, JavaScript, PHP, MySQL

TRAINING

Cipher Schools (Edtech Company) — Jun' 25 – Jul' 25

Data Structures and Algorithms Using Java | Certificate

- Earned Java Data Structures & Algorithms Certification featuring hands-on practice with algorithm design, core data structures (arrays, lists, stacks, queues, trees), and problem-solving challenges on platforms like LeetCode.
- Strengthened understanding of object-oriented programming principles in Java through practical application in data structures and algorithm exercises.
- Applied DSA knowledge to improve code efficiency and complexity analysis, enhancing readiness for technical interviews and software development tasks.

CERTIFICATES

- Data Structures and Algorithm using Java | CipherSchools — Jul' 25
- Cloud Computing | NPTEL — May' 25
- Responsive Web Design | FreeCodeCamp — Nov' 23

EDUCATION

- **Lovely Professional University** — Phagwara, Punjab
  Bachelor of Technology – Computer Science and Engineering; CGPA: 7.65 — Aug' 23 – Present
- **Krishna Public School** — Bilaspur, Chhattisgarh
  Intermediate; Percentage: 73.8% — Mar' 21 – May' 22
- **Krishna Public School** — Bilaspur, Chhattisgarh
  Matriculation; Percentage: 92.2% — Mar' 19 – May' 20
